

Factsheet

Kestrel Mine Extension

Resources

Project Title

Kestrel Mine Extension

Location

North east of Emerald, Central Queensland

Client

Rio Tinto Coal Australia

Project Type

Resources

Year Completed

2012

Project Description

Ausenco awarded \$53 Million contract to manage underground, surface infrastructure construction and coal preparation plant upgrade work for the Kestrel Joint Venture. Kramer Ausenco provided project engineering services during the procurement, construction, commissioning and handover for Kestrel Mine Extension. The extension is 7km southeast of the existing Kestrel Mine site. It has its own Mine Infrastructure Area, with two portals to the underground pit. Production is 5.7M Tonnes/year.

Project Role

- Project Package Engineer
- Project Engineer
