

Factsheet

PNGPCL TRAFFIC MANAGEMENT PLAN

Maritime

Project Title

Pom Container Terminal Traffic Assessment And Traffic Management Plan

Location

Port Moresby

Client

PNG Ports Corporation Limited

Project Type

Planning Study – Maritime

Year Completed

2014

Project Description

Due to an increase in cargo and the ongoing construction activities, the customers experience congestion internally and externally and longer waiting time for the delivery of services within the Container Terminal area.

PNG Ports Corporation Limited (PNGPCL) wishes to relieve this traffic congestion and improve service delivery time by reducing queue time.

Kramer Ausenco completed assessment and analysis of the traffic entering, circulating within and exiting the container terminal. From this, Kramer Ausenco produced a layout and Traffic Management Plan was produced.

Project Role

- Traffic Engineers
- Pavement Engineers
- Civil Engineers
