

July 22nd 2010

To Whom It May Concern:

This is to confirm that BSP/Colonial has engaged the services of Kramer Ausenco (Fiji) Ltd (KAFL) for engineering consultancy services for some of some of our past and current projects. We are more than happy to vouch for KAFL's professionalism in its services delivery. We have found KAFL's services of a high professional standard, with strengths not only in the experience of the staff but also the open line of communication, attention to detail and also their proactiveness

Some of the recent projects where we engaged KAFL to design and supervise works of the mechanical, electrical and hydraulics services include the following:

- Parade Building refurbishment project - total refurbishment of the 2 floors with new mechanical and electrical systems
- Nadi Bank Branch reinstatement project - reinstatement/betterment works after the flood. Due to the new layout a new mechanical and electrical system was warranted. The work also involved a security system design and installation.
- Cakobau Apartments water tanks installation

We are impressed by the level of professionalism and technical expertise displayed by KAFL during the projects and especially the delivery of quality services that ensured the timely completion of these projects.

We are currently working on a number of projects where KAFL is our main consultant. These include the following projects:

- Storage water tanks and pumping system for Suva Central Building
- CCTV for BSP bank branches nation wide
- Back up power system for BSP branches nation wide
- Back up power system for BSP/Colonial residential properties
- Structural upgrade of some BSP/Colonial residential properties

I have no hesitation in recommending KAFL's services to any potential client. Should you need further information please contact the undersigned on the above address or email on mratakele@bsp.com.fj
