AHC- AusAID Office Fit out

---

**Location**

Kabul

---

**Client**

DFAT

---

**Project Type**

Commercial

---

**Year Completed**

2011

---

### Project Description

Our role was to oversee the construction & refurbishment of the existing house No 5 in Kabul Afghanistan which included a Newey Barrier, internal refurbishment works, a new extension at the rear of the property, and a new container guardhouse at the front of the property. New R2 security doors and windows to the property, new air conditioning system, data and power services and new finishes required throughout. We understood the complexities with fitting new glazing and doors to the existing structure.

### Project Role

- Project Management
- Architectural
- Structural
- Mechanical
- Electrical
- Hydraulics
