

Factsheet

Port Moresby Harbour Development

Maritime

Project Title

POM Harbour Development

Location

Port Moresby, PNG

Client

Steamships

Project Type

Maritime

Year Completed

2012

Project Description

Kramer Ausenco provided civil and structural engineering expertise to this project. This project was carried out to upgrade the marine engineering services area in Port Moresby. The area was extended further into the sea and specified materials were poured into the area to reclaim land. During the construction phase, regular civil and structural engineering compliance inspections were carried out by our registered engineers to make sure the foundation structure is safe and meets set standards.

Project Role

- CAD Services
- Civil Engineering
- Structural Engineering
