

Factsheet

Wafi Golpu Project

Resources

Project Title

Wafi Golpu Project

Location

Morobe Province (65 km SE of Lae)

Client

Morobe Mining Joint Ventures
(Newcrest Mining Ltd. &
Harmony Gold Ltd.)

Mine Type

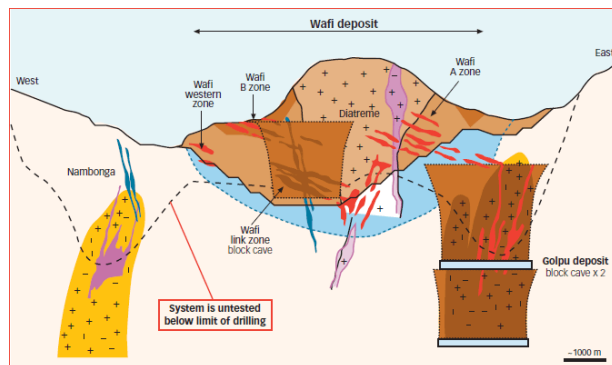

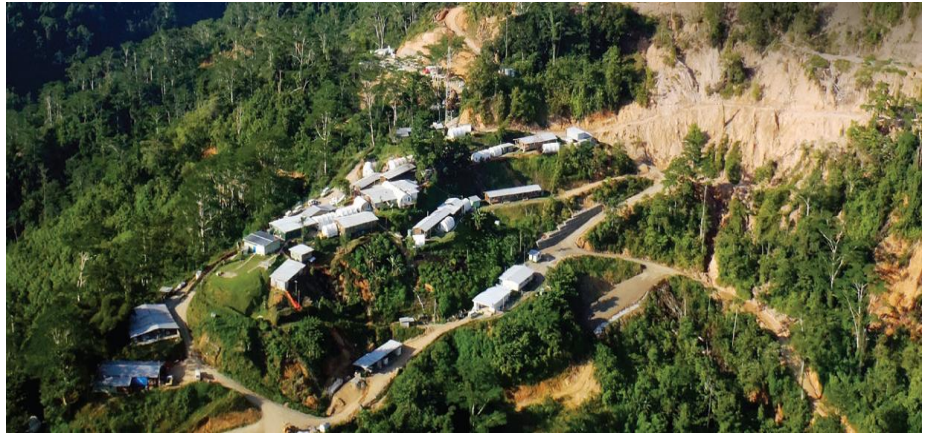

Open-Pit and Underground
Copper, Gold and Silver

Current Status

- 2012 Prefeasibility Study Completed
- MMJV Investigating CAPEX
reductions

Year Completed

On-going

Project Description

Kramer Ausenco has provided Engineering Design, Project Engineering and On-Site Project Services Support to the Wafi-Golpu Project. We provided support to the Owner's Team for coordination of infrastructure, ground investigation and survey studies. We also undertook design of Mining Support Infrastructure (Industrial Area) and provided an on-shore solution for logistical project services.

In addition to Kramer Ausenco's role on the project, Ausenco also completed a 2012 Prefeasibility Study for the 20MTPa Copper Concentrator and Concept designs for regional access and material transport corridors.

Project Role

- Project Engineering Services (Studies)
- On-shore Project Services (Logistics)
- Engineering (Engineering for Industrial Mine Support Area)
