

Factsheet

NPF Building Drainage Upgrade

Commercial, Residential and Industrial

Project Title

NPF Building Drainage Upgrade

Location

Point Cruz, Solomon Islands

Client

Solomon Island National Provident Fund

Project Type

Commercial

Year Completed

2009

Project Description

The upgrading of the drainage for NPF building at Point Cruz, Honiara

Kramer Ausenco were able to:

- Measure up detailed plan of existing drainage system, showing the layout of existing plan and cross sections
- Design the upgraded drainage system based on materials and information gathered during field work including interviews with stakeholder personnel regarding site history and relevant information
- Sketch up proposed plan to show the exact dimension of the proposed drainage system, and the location of downpipe boxes, sumps and cross section details for approval prior to construction issue

- Prepare the schedule of Works identifying scope of works to be carried out by the contractor
- Prepare the Bill of Quantities (BOQ) and a preliminary cost estimate base on the BOQ for budget purposes

Project Role

- Civil Engineers
