

Factsheet

Nuku'Alofa Port

Maritime

Project Title

Nuku'Alofa Port

Location

Nuku'Alofa, Kingdom of Tonga

Client

Australian International Development Assistance Bureau

Project Type

Port

Year Completed

1985

Project Description

The Nuku'alofa Port Development involved planning, site investigations, and detailed design and construction supervision services.

The site reclaimed on top of a coral reef, with the berths being dredged to 11 metres.

The port buildings included a transit and produce packing shed, passenger shelter, inter-island cargo shed and a gatehouse.

The services installed consisted of drainage and sewerage, area lighting, an electrical system for refrigerated container, and an oil pipeline.

Project Role

- Structural Engineers
- Civil Engineers
